---

## Ceph Overview

The HP Helion OpenStack 2.0 Ceph Storage Solution provides an unified scaleable and stable storage solution for the management of Helion OpenStack Volume Storage (Cinder persistent Volumes) service. The solution also supports user backup to the Object Storage (Swift) API service writing to the same unified Ceph storage platform.

The installation, configuration, and integration between HP Helion OpenStack: 2.0 and Ceph Firefly 0.80.7 running on the hlinux kernel 3.14.44-1 is detailed in [Ceph Configuration](#) page.
